*"The Bond Arms derringers exude quality. Some
would call them the "Cadillac" of derringers.
I would not. I have owned Cadillacs. Very good auto-
mobiles, but they are not up to the quality standards
of Bond Arms."

CAD DESIGNED CNC MACHINED HAND BUILT

RAPID RELOAD SHOOTING SYSTEM

Computer Numerically Controlled (CNC) Machining can maintain tolerances of .001 of an inch (a human hair's diameter is approximately .003). This precision machining allows for perfect interchange of barrels without custom-fitting. All Bond Arms pistols will accept 14 different barrels which will allow 24 different cartridges. Barrels chambered in .410 shot shell / .45 Colt will shoot bird shot, buck shot and slugs as well as the .45 Colt.

For rimless cartridges such as 9mm, .40 S&W, 10mm and .45 ACP. There is a cut out at the breech end of the barrel which allows you to remove the shells with your fingernail. Chambers are honed for smooth extraction.

When red is visible on the cross-bolt safety, the pistol is ready to fire.

Key Entry Internal Safety Locking Device (SLD). This acts as an effective child Safety Device.

ECONOMICAL:

The patented locking lever (rapid reload lever) allows a fully functional interchangeable barrel system which offers a level of flexibility unmatched by any other pocket pistol!

For additional barrels, no gunsmithing needed.

Changing barrels requires an 1/8" Allen wrench. Barrel can be changed in seconds.
