would call them the "Cadillac" of derringers.
I would not. I have owned Cadillacs.
Very good automobiles, but they are not up

PATENTED INTERCHANGEABLE BARREL SYSTEM

NO GUNSMITHING REQUIRED

**CAD DESIGNED
CNC MACHINED
HAND BUILT**

**RAPID RELOAD
SHOOTING SYSTEM**

SIGHTS:
Blade front and fixed rear.

SPRING LOADED EXTRACTOR:
Lifts the shells up automatically.

HIGH QUALITY STAINLESS STEEL:
Finest grade of stainless steel which has been heat treated for optimum performance and durability.

PATENTED REBOUNDING HAMMER:
Allows hammer to rebound to a blocked position off of the firing pins.

RETRACTING FIRING PINS:
Allows for safer reloading.

CROSSBOLT SAFETY:
Solid stainless steel, conveniently thumb operated.

SPECIAL GRIP DESIGN:
Distributes recoil over the palm of the hand resulting in less felt recoil.

GRIP:
Rosewood or black ash. Custom Grips are available.

PATENTED SPRING LOADED RAPID RELOAD LEVER: Provides for faster, easier loading/unloading, and a tighter barrel/frame fit.

INTERCHANGEABLE BARREL:
System allows for the different caliber barrels to be mounted on a common frame.

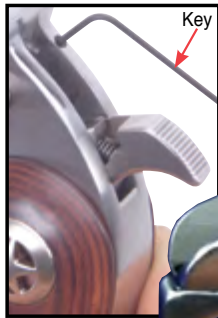

COMPUTER AIDED DESIGN:
Exact fit and superior mechanical performance with satin stainless finish.

TRIGGER GUARD:
Aids in controllability, and is removable for the classic derringer look.

For rimless cartridges such as 9mm, .40 S&W, 380acp, .45GAP, 10mm and .45 ACP. There is a cut out at the breech end of the barrel which allows you to remove the shells with your fingernail. Chambers are honed for smooth extraction.

Key Entry Internal Safety Locking Device (SLD). This acts as an effective child Safety Device.

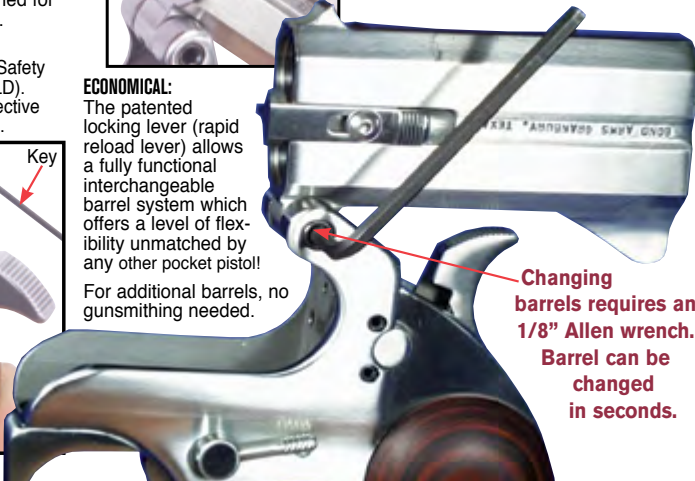

ECONOMICAL:
The patented locking lever (rapid reload lever) allows a fully functional interchangeable barrel system which offers a level of flexibility unmatched by any other pocket pistol!

For additional barrels, no gunsmithing needed.

When red is visible on the crossbolt safety, the pistol is ready to fire.

Changing barrels requires an 1/8" Allen wrench. Barrel can be changed in seconds.

Computer Numerically Controlled (CNC) Machining can maintain tolerances of .001 of an inch (a human hair's diameter is approximately .003). This precision machining allows for perfect interchange of barrels without custom-fitting. Bond Arms pistols will accept 15 different calibers and 36 different barrel combinations. Barrels chambered in .410 shot shell / .45 Colt will shoot bird shot, buck shot and slugs as well as the .45 Colt.

IN MEMORY OF OUR FRIEND 1942-2012
BOB MUNDEN "The Fastest Gun Who Ever Lived"

"If you are a Cowboy Action Shooter, man or woman, you are going to love this derringer. It is very fast and easy to use and built for extreme use. The Bond derringer is clever in design with exquisite workmanship. I have been shooting professionally for 47 years. I have never seen the likes of this one."
